Weed Control

*An Alternative Solution*

# Weed Control

## An Alternative Solution

Amongst other duties, infrastructure managers are responsible for maintaining a weed-free environment around a diverse range of council-owned assets. These can include the following:

- // Parks & gardens
- // Streetscapes
- // Road reserves
- // Other public infrastructure & assets

We understand that this is not an easy job. You are required to work across a geographically large area, often with multiple teams, coordinate maintenance schedules and of course, stay within budget. For many years glyphosate has been a mainstay for quick, easy, safe and inexpensive weed control, however, in recent times councils are under increasing pressure to minimise their overall use of glyphosate-based products.

Thankfully, there is Esplanade® Herbicide from Bayer. Esplanade is unlike anything else on the market; a pre-emergent herbicide that features a new mode of action, providing effective, long-lasting control. Esplanade is setting a new standard in bare-ground weed control.

Now you can raise the bar without compromising on safety, quality or budgets.

### Solution for Tough Weeds

- // Superior broad-spectrum control of over 30 weed species, including annual grasses & broadleaf weeds
- // Esplanade Herbicide will give residual control even on tough to manage weeds like resistant Annual Ryegrass, Fleabane and Panic Veldt Grass
- // Unique mode of action helps manage herbicide resistance and plays a key role in an integrated weed management strategy

Some common weeds controlled by Esplanade include:

#### Grasses:

- Ryegrass
- Brome Grass
- Wild Oats
- Winter Grass
- Summer Grass
- Panic Veldt Grass
- Silver Grass
- Yorkshire Fog Grass

#### Broadleaf weeds:

- Fleabane
- Capeweed
- Dandelion
- Clovers
- Sow thistle
- Scotch thistle
- Asthma weed
- Paterson's curse

Annual Ryegrass

Fleabane

### Benefits & Features of using Esplanade

- // Convenient and easy-to-use packaging
- // Odourless and non-staining to surfaces
- // Up to 60 times less active ingredient on the ground compared to some competitor products
- // Applied at low use rate of 150 mL/ha
- // Less post-emergent herbicide applications result in reduced labour and fuel costs
- // Solution for tough weeds
